

September 2024

Matt Tontonoz

Santa Cruz for the annual meeting of the Human Pangenome Resource Consortium at the invitation of Bob Cook-Deegan, which was directly relevant to my dissertation, which concerns genomic medicine.

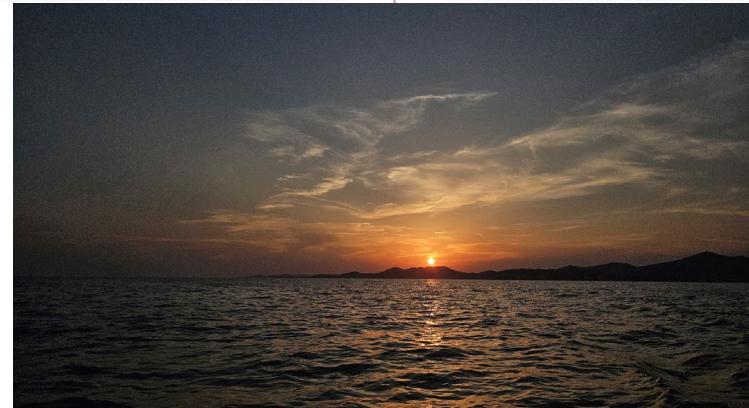

July and August 2024

Baylee Edwards

International Research Network for the Study of Science and Belief in Society Conference
in Frankfurt, Germany

20th European Conference on Science and Theology Split, Croatia

I was fortunate enough to attend and present at two international conferences during the summer of 2024, both of which allowed me to learn from scholars in a variety of fields who think about similar topics to myself but in very different contexts. I met some incredible people and found new ways to conceptualize my research, all while exploring two beautiful countries I'd never been to before!

July 2024 - British and Irish Association of Zoos and Aquariums Research – Daniel Bisgrove

I was thrilled to attend the BIAZA Research Conference, which was hosted in Cork, Ireland, this July. The people were lovely, and it was a wonderful opportunity to learn more about academic research and zoo-academic partnerships in Europe. I was honored to receive a commendation for my presentation on my dissertation research, but more importantly, I got to meet an adorable 3-year-old black rhino!

History of Biology, May, 2024

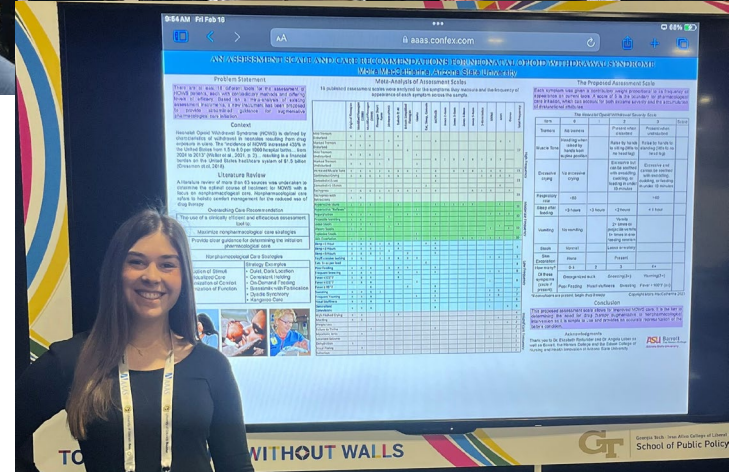

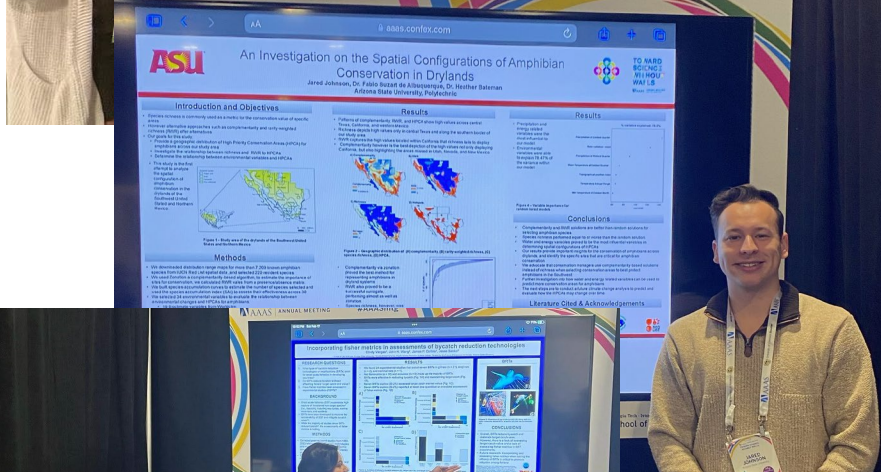

The MBL-ASU History of Biology seminar is a rare opportunity to spend a week delving deep into a topic with a group of exceptional scholars. I am so grateful that I have been able to go these past two years, to learn about the role of historical contingency in the life sciences. And Woods Hole is a magical setting for this sort of work. – Matt Tontono

February 2024 AAAS Annual Meeting, Denver CO

Each year, the Center for Biology and Society and Barrett, the Honors College at ASU send undergraduate and graduate researchers to present their research to the American Association for the Advancement of Science annual meeting. It is unique opportunity for mentorship, professional development, and highlighting the hard work of our ASU students.

In 2024, 15 ASU undergraduate and graduate students had posters accepted and presented their findings at the AAAS annual meeting. Eight of them received awards in their categories.

December 2023

World Leisure Congress – Daniel Bisgrove

I was extremely fortunate to attend a tourism studies conference in New Zealand this December and present two presentations, one on my dissertation's environmental ethics survey scale and one on examining the leisure conflicts surrounding unhoused pet ownership, which has since been adapted into a publication. Beyond making excellent international connections and seeing amazing wildlife, I also got to meet my committee member from ASU Downtown, Dr. Megha Budruk, in person for the first time!

July 2023 International Society for the History of Philosophy and Social Studies of Biology Conference – Jarrett Joubert

“

ISH was the first academic conference I attended and I was lucky to get elected as Student Representative during the 2023 Toronto meeting. I was even nominated by an ASU Center for Biology and Society colleague! Being active within the organization means I have the opportunity to advocate on behalf of graduate students to the Executive Council. That puts me in conversation with many kind and passionate scholars and I am grateful for the opportunity to lead alongside them.
